Finalists Announced in 2021 CSA Awards Programme

Having been forced to withdraw from staging its annual awards dinner and presentation ceremony last year, due to the disruption caused by the COVID-19 pandemic, the Commissioning Specialists Association is looking forward to its return on the evening of Thursday 11th November 2021.

Originally scheduled for its regular slot in June 2020, following hugely successful events having been staged every year since 2015, the Gala Awards Ceremony will return to the Guoman Tower Hotel, nestled between Tower Bridge and St Katherine's Dock on the banks of the River Thames in London.

The event will once again bring together the entire commissioning sector in a celebration of business and professional excellence. Recognising and rewarding the achievements of both individuals and companies operating within this crucial area of the construction and refurbishment industry, personal endeavour, product innovation, skills training, engineering advancement and commercial acumen will be acknowledged and celebrated.

Operated by the Commissioning Specialists Association and produced by Touchwave Media, the awards will again acknowledge the skill, effort and sheer dedication of the people and businesses serving today's complex built environment business sector. With sponsorship provided by a host of leading industry names, well deserved industry-wide recognition will be given to those businesses and individuals that are excelling in their commissioning endeavours.

Finalists

Following a comprehensive judging process, which this year combined the remote assessment and scoring of each entry with a virtual gathering of the judging panel, the CSA is delighted to announce the following 23 Finalists across the seven award categories:

Project of the Year - **Sponsored by BSRIA Instrument Solutions**

- Expo Village - Dubai United Arab Emirates, AESG
- Battersea Power Station Phase 2, Ashford Environmental Services

Engineer of the Year - **Sponsored by Ashford Environmental Services**

- Frederick Alconcel, AESG
- James Vigurs, Airtech Premier
- Joe McCulloch, EnviroCom

Our sincere congratulations go to all those who have been selected as a Finalist, and we look forward to announcing the seven award winners during the charged atmosphere of the presentation ceremony on the evening of Thursday 11th November.

Mark Todd, CSA Chairman, commented: "The 2019 CSA Awards proved to be a huge success and once again provided an excellent forum through which to celebrate business and professional excellence. I very much look forward to building on that success with the delayed 2021 awards programme which I feel sure will provide another superb platform for promoting the excellent work being undertaken by commissioning engineers across the sector. As the saying goes, 'you need to be in it to win it', and the submissions this year were again of an extremely high calibre. Just being selected as a finalist is a tremendous achievement and I would applaud all those you have made it this far. We now very much look forward to seeing you will be announced as the eventual Winners."

If you have not yet booked your place at this highly respected event, please visit the website, and complete the online booking form. Individual places or tables of ten can be secured, with the package including reception drinks, a superb 3-course meal with wine, the awards ceremony itself and excellent post awards entertainment. It really is a night not to be missed, and after the difficulties we have all endured over the past eighteen months, it is most definitely time to re-engage, re-unite, and celebrate the wonderful achievements of this important of industry sector.

Note to Editors:

About CSA

Established in 1990, the CSA is an association for the commissioning industry within the construction world.

Its membership comprises commissioning industry companies, individual commissioning engineers and associated companies (such as equipment manufacturers, instrument suppliers, etc.), who have a vested interest in ensuring that the commissioning function in today's complex built environment is carried out to a uniformly high standard.
